CSS, SASS, SCSS, Garden,  
and a modicum of Ruby,  
Clojure, and Javascript

### EDUCATION

University of Illinois, Urbana-Champaign  
BFA in Graphic Design &  
BFA in Painting

## Phlint

UX DESIGNER, ILLUSTRATOR, FRONT-END DEVELOPER, ETC | 2018-PRESENT

As a partner for this consulting firm, I supplemented my visual skills with project management responsibilities: I orchestrated a redesign of software training videos website Clean Coders involving myself and a small team of developers. I also designed a subscription app for medical company Resmed, a web app for startup Givelist, and illustrated a digital children's book.

## Centriq

UX DESIGNER, ILLUSTRATOR, FRONT-END DEVELOPER | 2016-2018

I designed version 2.0 of Centriq's mobile app, as well as designed and wrote the front end code for an administrative web app for their employees. Version 3.0 of their mobile app was initiated by an external consulting firm, after which I took over in fleshing out further details of user experience, user interface, and iconography. As their resident designer, I also created presentations and marketing material as needed.

## Airworthy

UX DESIGNER, ILLUSTRATOR, FRONT-END DEVELOPER, ETC | 2014-2015

Micah Martin, owner of 8th Light, selected his brother and I to co-found a company surrounding an app for pilots. In addition to designing both the web and mobile apps for the product, I illustrated my way through the brand's identity and marketing, including a blog and a trade show booth.

## 8th Light, Inc.

UX DESIGNER, ILLUSTRATOR, FRONT-END DEVELOPER | 2011-2014

I worked on many projects at this consulting company, on teams as small as 1 and as large as 20, and in codebases of seemingly every language. In addition, I contributed a modest portion of my time toward internal marketing and branding, including the company's own website and blog.
